Shahdara, Delhi | +91-8595774158 | sakshamtyagi1969@gmail.com | [LinkedIn](#) | [Portfolio](#)

SKILLS

Languages and DataBases: React Native, React.js, Node.js, Python, JavaScript, TypeScript, Java, SQL, MySQL, MongoDB

Visualization Tools: Power BI

Other Skills: Advanced Excel, Data Analysis

WORK EXPERIENCE

Associate Digital Consultant, StatusNeo (Client: IndiGo)

Jan 2025 - Present

- Developed and maintained core modules (booking flow, in-flight services, check-in) in React Native, integrating with RESTful APIs to support 100K+ monthly active users.
- Collaborated within a cross-functional Agile team of 5 (UX, QA, backend), contributing to 8+ feature releases and helping reduce critical bugs by 30%.
- Optimized app performance by refactoring navigation logic and enabling on-demand code-splitting, improving launch time by 25%.
- Worked closely with IndiGo's product and UX teams to design and implement new UI components (seat selection, multi-leg booking), increasing user completion rates by 15%.
- Integrated third-party libraries (e.g., Firebase Analytics, Sentry) to enhance crash reporting and user behavior tracking, cutting issue-resolution time by 40%.

PROJECTS

Pass Valut

[Link](#)

- Designed and Engineered** a fully responsive and interactive password management website, **PassVault**, using **ReactJS** and **Tailwind CSS**, ensuring a seamless and intuitive user experience across all devices.
- Empowered Users** to securely manage their passwords by enabling functionalities such as adding, viewing, and organizing password details for multiple accounts.
- Implemented Secure Data Management** by leveraging encryption techniques and integrating **LocalStorage API**, providing a **reliable and persistent** solution to store user data securely, even across browser sessions.
- Enhanced User Interaction with a clean and minimalist UI powered by **Tailwind CSS**, delivering a visually appealing and easy-to-navigate design.
- Optimized **Application Workflow** by incorporating **state management** in React, ensuring smooth performance and responsiveness for a superior user experience.
- Owned the Full Development Lifecycle**, including UI/UX design, implementation of core functionalities, debugging, and ensuring cross-browser compatibility.

Facial Recognition Based Attendance System

[Link](#)

- Developed and Engineered** an innovative **Facial Recognition Based Attendance System**, leveraging **Siamese Network architecture** to enable accurate and efficient face-based identification.
- Streamlined Attendance Management** by **automating** the process of student identification and record-keeping, replacing traditional manual methods with a **secure and seamless solution**.
- Implemented Advanced Features**, including **real-time face** detection and recognition, supported by a robust backend built with the **Siamese Network model**.
- Optimized Data Handling** by integrating **Firebase** to securely store and manage student information, ensuring reliability and scalability.

EDUCATION

Inderprastha Engineering College
B.Tech - CSE (AI & M) – 7.9 CGPA

Sep 2020 – Aug 2024
Ghaziabad, U.P

ACHIVEMENTS

- Part of the annual fest **technical team**, responsible for creating and maintaining the website for two consecutive years.
- Achieved a **five-star** rating in React.js, SQL, and JavaScript on **HackerRank**.
